RPAC2 Polyclonal Antibody

Catalog No YP-Ab-05540 Isotype IgG Reactivity Human;Rat;Mouse; Applications WB;ELISA Gene Name POLR1D Protein Name DNA-directed RNA polymerases I and III subunit RPAC2 (RNA polymerases I and III subunit AC2) (AC19) (DNA-directed RNA polymerase I subunit D) (RNA polymerase I polymerase I to RDa subunit D) (RNA polymerase I polymerase I to RDa Subunit D) (RNA polymerase I polymerase I to RDa Subunit D) (RNA polymerase I polymerase I to RDa Subunit D) (RNA polymerase I polymerase I to RDa Subunit D) (RNA polymerase I polymerase III complex DNA-directed RNA polymerase III polymerase I polym		
Reactivity	Catalog No	YP-Ab-05540
Applications WB;ELISA Gene Name POLR1D Protein Name DNA-directed RNA polymerases I and III subunit RPAC2 (RNA polymerases I and III subunit AC2) (AC19) (DNA-directed RNA polymerase I subunit D) (RNA polymerase I 16 kDa subunit) (RPA16) (RPC-16) (RRPA19) Immunogen Synthesized peptide derived from part region of human protein Specificity RPAC2 Polyclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 ELISA 1:5000-20000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 14kD Cell Pathway nucleoplasm,DNA-directed RNA polymerase III complex,DNA-directed RNA polymerase I complex,cytosol, Tissue Specificity Cerebellum,Cervix,Colon,Eye,Kidney,Ovarian carcinoma, Function function:DNA-dependent RNA polymerase catalyzes the transcription of DNA into RNA using the four ribonucleoside triphosphates as substrates. Common core component of RNA polymerases I and III which synthesize ribosomal RNA precursors and small RNAs, such as SS rRNA and tRNAs, polymerase I and RNAs polymerase III (or III) complexes consisting of at least 13 and 17 subunits, respectively, similarity belongs to the archaeal rpol-clukaryotic RPB11/RPC19 RNA polymerase III (or III) complexes consisting of at least 13 and 17 reacher Collins syndrome (TCS), a craniofacial development disorder. The protein encoded by this gene is a component of the RNA polymerase I and RNA polymerase III complexes, which function in this gene are a cause of Treacher Collins syndrome (TCS), a craniofacial development disorder.	Isotype	lgG
Gene Name POLR1D Protein Name DNA-directed RNA polymerases I and III subunit RPAC2 (RNA polymerases I and III subunit AC2) (AC19) (DNA-directed RNA polymerase I subunit D) (RNA polymerase I 16 kDa subunit) (RPA15) (RPC16) (InRPA19) Immunogen Synthesized peptide derived from part region of human protein Specificity RPAC2 Polyclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 ELISA 1:5000-20000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 14kD Cell Pathway nucleoplasm, DNA-directed RNA polymerase III complex, DNA-directed RNA polymerase III complex, DNA-directed RNA polymerase as a substrates. Common core component of RNA polymerases III complexes as substrates. Common core component of RNA polymerases III and Which synthesize ribosomal RNA precursors and small RNAs, such as 55 rRNA and tRNAs, respectively, similarity-Belongs to the archaeal rpoL/eukpric RPB1/IRPC19 RNA polymerase III complexes consisting of at least 13 and 17 subunits, respectively. Background The protein encoded	Reactivity	Human;Rat;Mouse;
Protein Name DNA-directed RNA polymerases I and III subunit RPAC2 (RNA polymerases I and III subunit AC2) (AC19) (DNA-directed RNA polymerase I subunit D) (RNA polymerase I 16 kDa subunit) (RPA16) (RPC16) (hRPA19) Immunogen Synthesized peptide derived from part region of human protein Specificity RPAC2 Polyclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 ELISA 1:5000-20000 Concentration 1 mg/ml Purity 290% Storage Stability -20°C/1 year Synonyms Observed Band 14kD Cell Pathway nucleoplasm,DNA-directed RNA polymerase III complex,DNA-directed RNA polymerase I complex,cytosol, Tissue Specificity Cerebellum,Cervix,Colon,Eye,Kidney,Ovarian carcinoma, function:DNA-dependent RNA polymerase catalyzes the transcription of DNA into RNA using the four ribonucleoside triphosphates as substrates. Common core component of RNA polymerases I and III which synthesize ribosomal RNA precursors and small RNAs, such as 55 rRNA and rRNAs, respectively, similarity.Belongs to the archaeal rpoL/eukaryotic RPB11/RPC19 RNA polymerase subunit family, subunit:Component of the RNA polymerase I (Pol II) and RNA polymerase III (Pol III) complexes consisting of at least 13 and 17 subunits, respectively, similarity.Belongs to the archaeal rpoL/eukaryotic RPB1/RPC19 The protein encoded by this gene is a component of the RNA polymerase I and RNA polymerase III (Pol III) complexes consisting of at least 13 and 17 reacher Collins syndrome (TCS), a craniofacial development disrosomal RNA precursors and small RNAs, respectively. Figorovided by RefSeq, Apr	Applications	WB;ELISA
Ill subunit AC2) (AC19) (DNA-directed RNA polymerase I subunit D) (RNA polymerase I 16 kDa subunit) (RPA16) (RPC16) (RPRA19) Immunogen Synthesized peptide derived from part region of human protein Specificity RPAC2 Polyclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 ELISA 1:5000-20000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 14kD Cell Pathway nucleoplasm, DNA-directed RNA polymerase Ill complex, DNA-directed RNA polymerase I complex, cytosol, Tissue Specificity Cerebellum, Cervix, Colon, Eye, Kidney, Ovarian carcinoma, function: DNA-dependent RNA polymerase catalyzes the transcription of DNA into RNA using the four ribonucleoside triphosphates as substrates. Common core component of RNA polymerases I and Ill which synthesize ribosomal RNA respectively, similarity. Belongs to the archaeal rpol_eukaryotic RPB11/RPC19 RNA polymerases Ill (Pol III) complexes consisting of at least 13 and 17 subunits, respectively. Background The protein encoded by this gene is a component of the RNA polymerase I and RNA polymerases Ill complexes, which function in the synthesis of ribosomal RNA precursors and small RNAs, respectively. Mutations in this gene are a cause of Treacher Collins syndrome (TCS), a craniofacial development disroporder. Alternative splicing results in mutiple transcript variants. [provided by RefSeq, Apr	Gene Name	POLR1D
Specificity RPAC2 Polyclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 ELISA 1:5000-20000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 14kD Cell Pathway nucleoplasm, DNA-directed RNA polymerase III complex, DNA-directed RNA polymerase I complex, cytosol, Tissue Specificity Cerebellum, Cervix, Colon, Eye, Kidney, Ovarian carcinoma, function: DNA-dependent RNA polymerase catalyzes the transcription of DNA into RNA using the four ribonucleoside triphosphates as substrates. Common core component of RNA polymerase I and III which synthesize ribosomal RNA precursors and small RNAs, such as 5S rRNA and tRNAs, respectively, similarity: Belongs to the archaeal rpoL/eukaryotic RPB11/RPC19 RNA polymerase subunit family, subunit: Component of the RNA polymerase I (Pol III) complexes consisting of at least 13 and 17 subunits, respectively. Background The protein encoded by this gene is a component of the RNA polymerase I and RNA precursors and small RNAs, respectively. Mutations in this gene are a cause of Treacher Collins syndrome (TCS), a craniofacial development disorder. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Apr	Protein Name	DNA-directed RNA polymerases I and III subunit RPAC2 (RNA polymerases I and III subunit AC2) (AC19) (DNA-directed RNA polymerase I subunit D) (RNA polymerase I 16 kDa subunit) (RPA16) (RPC16) (hRPA19)
