## RAB28 Polyclonal Antibody

| Catalog No                | YP-Ab-06045  |
|---------------------------|--|
| Isotype                   | IgG  |
| Reactivity                | Human;Rat;Mouse  |
| Applications              | WB;ELISA   |
| Gene Name                 | RAB28  |
| Protein Name              | Ras-related protein Rab-28   |
| Immunogen                 | Synthesized peptide derived from human protein . at AA range: 80-160   |
| Specificity               | RAB28 Polyclonal Antibody detects endogenous levels of protein.  |
| Formulation               | Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.   |
| Source                    | Polyclonal, Rabbit,IgG   |
| Purification              | The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  |
| Dilution                  | WB 1:500-2000 ELISA 1:5000-20000   |
| Concentration             | 1 mg/ml  |
| Purity                    | ≥90%   |
| Storage Stability         | -20°C/1 year   |
| Synonyms                  |  |
| Observed Band             | 24kD   |
| Cell Pathway              | Cell membrane ; Lipid-anchor ; Cytoplasmic side . Cytoplasm, cytoskeleton, cilium basal body. Expressed in the basal body and ciliary rootlet of the photoreceptors  |
| Tissue Specificity        | Isoform S is detected in most tissues investigated: cortex, liver, kidney, skeletal muscle, adipose tissue, testis, urothelium, lung, bone marrow and retinal pigment epithelium (RPE). Isoform L 2 is widely and abundantly expressed all tissues. Isoform 3 is highly expressed in heart, lung, bone marrow, retina, brain, and RPE. |
| Function                  | similarity:Belongs to the small GTPase superfamily. Rab family.,tissue specificity:Isoform S is detected in most tissues investigated (cortex, liver, kidney, skeletal muscle, adipose tissue, testis and urothelium), whereas isoform L is predominant in testis.,  |
| Background                | This gene encodes a member of the Rab subfamily of Ras-related small GTPases. The encoded protein may be involved in regulating intracellular trafficking. Alternative splicing results in multiple transcript variants. Pseudogenes of this gene are found on chromosomes 9 and X. [provided by RefSeq, Apr 2009],                    |
| matters needing attention | Avoid repeated freezing and thawing!   |
|                           |  |

**Usage suggestions** 

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.

Western blot analysis of lysates from A431 cells, primary antibody was diluted at 1:1000, 4° over night
