

## OR5K2 Polyclonal Antibody

Catalog No         YP-Ab-07504           Isotype         IgG           Reactivity         Human;Rat;Mouse;           Applications         WB:ELISA           Gene Name         OR5K2           Protein Name         Olfactory receptor 5K2 (Olfactory receptor OR3-9)           Immunogen         Synthesized peptide derived from human protein . at AA range: 30-110           Specificity         OR5K2 Polyclonal Antibody detects endogenous levels of protein.           Formulation         Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.           Source         Polyclonal, Rabbit, IgG           Purification         The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.           Dilution         WB 1:500-2000 ELISA 1:5000-2000           Concentration         1 mg/ml           Purity         ≥90%           Storage Stability         -20°C/1 year           Synonyms         Observed Band         34kD           Cell Pathway         Cell membrane; Multi-pass membrane protein.           Tissue Specificity         Function         function:Odorant receptor .;similarity:Belongs to the G-protein coupled receptor 1 family. of Interest of the Capability of Capability in the larget in the nose, to initiate a raining from single coding-gene gene peripon of a smell. The olfactory receptor gene family is the larget or 1-transmem		
Reactivity Human;Rat;Mouse;  Applications WB;ELISA  Gene Name OR5K2  Protein Name Olfactory receptor 5K2 (Olfactory receptor OR3-9)  Immunogen Synthesized peptide derived from human protein . at AA range: 30-110  Specificity OR5K2 Polyclonal Antibody detects endogenous levels of protein.  Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.  Source Polyclonal, Rabbit,IgG  Purification The antibody was affinity-purified from rabbit antiserum by affinity-romatography using epitope-specific immunogen.  Dilution WB 1:500-2000 ELISA 1:5000-20000  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms  Observed Band 34kD  Cell Pathway Cell membrane; Multi-pass membrane protein.  Tissue Specificity  Function function:Odorant receptor ., similarity:Belongs to the G-protein coupled receptor 1 family.  Background Olfactory receptor family 5 subfamily K member 2(OR5K2) Homo sapiens olfactory receptors theract with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated thrusduction of odorant singlas. The olfactory receptor genes and proteins for this organisms is independent of other organisms. Browded by the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organisms is independent of other organisms. Browded by	Catalog No	YP-Ab-07504
Applications WB;ELISA  Gene Name OR5K2  Protein Name Olfactory receptor 5K2 (Olfactory receptor OR3-9)  Immunogen Synthesized peptide derived from human protein . at AA range: 30-110  Specificity OR5K2 Polyclonal Antibody detects endogenous levels of protein.  Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.  Source Polyclonal, Rabbit.lgG  Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution WB 1:500-2000 ELISA 1:5000-20000  Concentration 1 mg/ml  Purity 290%  Storage Stability -20°C/1 year  Synonyms  Observed Band 34kD  Cell Pathway Cell membrane; Multi-pass membrane protein.  Tissue Specificity  Function function:Odorant receptor .,similarity:Belongs to the G-protein coupled receptor 1 family.,  Background Olfactory receptor family 5 subfamily K member 2(OR5K2) Homo sapiens Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor semily is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms. [provided by	Isotype	IgG
Gene Name OR5K2  Protein Name Olfactory receptor 5K2 (Olfactory receptor OR3-9)  Immunogen Synthesized peptide derived from human protein . at AA range: 30-110  Specificity OR5K2 Polyclonal Antibody detects endogenous levels of protein.  Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.  Source Polyclonal, Rabbit, IgG  Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution WB 1:500-2000 ELISA 1:5000-20000  Concentration 1 mg/ml  Purity 290%  Storage Stability -20°C/1 year  Synonyms  Observed Band 34kD  Cell Pathway Cell membrane; Multi-pass membrane protein.  Tissue Specificity  Function function:Odorant receptor "similarity:Belongs to the G-protein coupled receptor 1 family.,  Background Olfactory receptor family 5 subfamily K member 2(OR5K2) Homo sapiens Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor roteins are members of a large family of G-protein-coupled receptors of a receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor genes and the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organisms is independent of other organisms, provided by	Reactivity	Human;Rat;Mouse;
Immunogen   Synthesized peptide derived from human protein . at AA range: 30-110	Applications	WB;ELISA
Immunogen         Synthesized peptide derived from human protein . at AA range: 30-110           Specificity         OR5K2 Polyclonal Antibody detects endogenous levels of protein.           Formulation         Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.           Source         Polyclonal, Rabbit, IgG           Purification         The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
