

S13A5 rabbit pAb

Catalog No	YP-Ab-08043
Isotype	IgG
Reactivity	Human; Mouse; Rat
Applications	WB
Gene Name	SLC13A5 NACT
Protein Name	S13A5
Immunogen	Synthesized peptide derived from human S13A5 AA range: 313-363
Specificity	This antibody detects endogenous levels of S13A5 at Human/Mouse/Rat
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.157% sodium azide.
Source	Polyclonal, Rabbit, IgG
Purification	The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen.
Dilution	WB 1:500-2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	Solute carrier family 13 member 5 (Na ⁺)/citrate cotransporter (NaCT) (Sodium-coupled citrate transporter) (Sodium-dependent citrate transporter)
Observed Band	60kD
Cell Pathway	Cell membrane ; Multi-pass membrane protein .
Tissue Specificity	Expressed most predominantly in the liver, with moderate expression detectable in the brain and testis.
Function	function: High-affinity sodium/citrate cotransporter that mediates citrate entry into cells. The transport process is electrogenic; it is the trivalent form of citrate rather than the divalent form that is recognized as a substrate. May facilitate the utilization of circulating citrate for the generation of metabolic energy and for the synthesis of fatty acids and cholesterol. similarity: Belongs to the SLC13A transporter (TC 2.A.47) family. NADC subfamily. tissue specificity: Expressed most predominantly in the liver, with moderate expression detectable in the brain and testis.
Background	This gene encodes a protein belonging to the solute carrier family 13 group of proteins. This family member is a sodium-dependent citrate cotransporter that may regulate metabolic processes. Mutations in this gene cause early infantile epileptic encephalopathy 25. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Aug 2014],
