

PAQRA rabbit pAb

Catalog No	YP-Ab-11823
Isotype	IgG
Reactivity	Human; Mouse
Applications	WB
Gene Name	MMD2 PAQR10
Protein Name	PAQRA
Immunogen	Synthesized peptide derived from human PAQRA AA range: 30-80
Specificity	This antibody detects endogenous levels of PAQRA at Human/Mouse
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Polyclonal, Rabbit,IgG
Purification	The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen.
Dilution	WB 1: 500-2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	
Synonyms Observed Band	
-	Golgi apparatus membrane ; Multi-pass membrane protein .
Observed Band	Golgi apparatus membrane ; Multi-pass membrane protein . Shows restricted expression with highest levels in brain and testis.
Observed Band Cell Pathway	
Observed Band Cell Pathway Tissue Specificity	Shows restricted expression with highest levels in brain and testis. similarity:Belongs to the ADIPOR family., This gene encodes a member of the PAQR (progestin and adipoQ receptor) family. Members of this family are evolutionarily conserved with significant sequence identity to bacterial hemolysin-like proteins and are defined by a set of seven transmembrane domains. The protein encoded by this gene localizes to the
Observed Band Cell Pathway Tissue Specificity Function	Shows restricted expression with highest levels in brain and testis. similarity:Belongs to the ADIPOR family., This gene encodes a member of the PAQR (progestin and adipoQ receptor) family. Observed Band Cell Pathway Tissue Specificity Function Background matters needing	Shows restricted expression with highest levels in brain and testis. similarity:Belongs to the ADIPOR family., This gene encodes a member of the PAQR (progestin and adipoQ receptor) family. Members of this family are evolutionarily conserved with significant sequence identity to bacterial hemolysin-like proteins and are defined by a set of seven transmembrane domains. The protein encoded by this gene localizes to the Golgi apparatus to modulate Ras signaling. Alternative splicing results in multiple transcript variants and protein isoforms.
