

TULP3 rabbit pAb

Catalog No	YP-Ab-11904
Isotype	IgG
Reactivity	Human; Mouse
Applications	WB
Gene Name	TULP3 TUBL3
Protein Name	TULP3
Immunogen	Synthesized peptide derived from human TULP3 AA range: 257-307
Specificity	This antibody detects endogenous levels of TULP3 at Human/Mouse
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Polyclonal, Rabbit,IgG
Purification	The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen.
Dilution	WB 1: 500-2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	
Observed Band	
Cell Pathway	Nucleus. Cell membrane. Cell projection, cilium . Cytoplasm . Secreted . Does not have a cleavable signal peptide and is secreted by a non-conventional pathway (By similarity). Translocates from the plasma membrane to the nucleus upon activation of guanine nucleotide-binding protein G(q) subunit alpha. .
Tissue Specificity	Expressed at high levels in testis, ovaries, thyroid, and spinal chord.
Function	similarity:Belongs to the TUB family.,tissue specificity:Expressed at high levels in testis, ovaries, thyroid, and spinal chord.,
Background	This gene encodes a member of the tubby gene family of bipartite transcription factors. Members of this family have been identified in plants, vertebrates, and invertebrates, and they share a conserved N-terminal transcription activation region and a conserved C-terminal DNA and phosphatidylinositol-phosphate binding region. The encoded protein binds to phosphoinositides in the plasma membrane via its C-terminal region and probably functions as a membrane-bound transcription regulator that translocates to the nucleus in response to phosphoinositide hydrolysis, for instance, induced by G-protein-coupled-receptor signaling. It plays an important role in neuronal development and function. Two transcript variants encoding distinct isoforms have been identified for this gene. [provided by RefSeq, May 2009],
