

RFX6 rabbit pAb

Catalog No YP-Ab-12165 Isotype IgG Reactivity Human; Mouse Applications WB;ELISA;IHC Gene Name RFX6 RFXDC1 Protein Name RFX6 Immunogen Synthesized peptide derived from human RFX6 AA range: 264-314 Specificity This antibody detects endogenous levels of RFX6 at Human/Mouse Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. Dilution WB 1:500-2000;IHC-p 1:50-300; ELISA 2000-20000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Cell Pathway Nucleus . Tissue Specificity Expressed in pancreas (PubMed:25497100). Expressed in pancreatic beta-cells (insulin-positive cells) and alpha-cells (glucagon-positive cells) (at protein level). Specifically expressed in pancreas, small intestine and colon (PubMed:25497100). Function similarity:Belongs to the RFX family. Background The nuclear protein encoded by this gene is a member o

Tissue Specificity Expressed in pancreas (PubMed:25497100). Expressed in pancreatic beta-cells (insulin-positive cells) and alpha-cells (glucagon-positive cells) (at protein level). Specifically expressed in pancreas, small intestine and colon (PubMed:25497100). Function similarity:Belongs to the RFX family., Background The nuclear protein encoded by this gene is a member of the regulatory factor X (RFX) family of transcription factors. Studies in mice suggest that this gene is specifically required for the differentiation of slet cells for the production of insulin, but not for the differentiation of pancreatic polypeptide-producing ells. It regulates the transcription factors involved in beta-cell maturation and function, thus, evaractiving the expression of the beta-cell differentiation and specification genes. Mutations in this gene are associated with Mitchell-Riley syndrome, which entracterized by neonated in bypongaria, duodenal and	Catalog No	YP-Ab-12165
