

CtIP Monoclonal Antibody

Catalog No YP-mAb-01637 Isotype IgG Reactivity Human;Mouse Applications WB Gene Name RBBP8 Protein Name DNA endonuclease RBBP8 Immunogen The antiserum was produced against synthesized peptide derived from human CTIP. AA range:293-342 Specificity CIIP Monoclonal Antibody detects endogenous levels of CtIP protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-1:2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RBBP8; CTIP; DNA endonuclease RBBP8; CIBP-interacting protein; CIIP; Retinoblastoma-binding protein 8; RBBP-8; Retinoblastoma-interacting protein and myosin-like; RIM; Sporulation in the absence of SPO11 protein 2 homolog; SAE2 Observed Band 100kD Cell Pathway Nucleus. Chromosome. Associates with sites of DNA damage in S/G2 phase (PubMed:10764811, PubMed:25349192). Ubiquitinated RBBP8 binds to chromatin following DNA damage (PubMed:16818604).<

UpingBio technology Co.,Ltd

Background	The protein encoded by this gene is a ubiquitously expressed nuclear protein. It is found among several proteins that bind directly to retinoblastoma protein, which regulates cell proliferation. This protein complexes with transcriptional co-repressor CTBP. It is also associated with BRCA1 and is thought to modulate the functions of BRCA1 in transcriptional regulation, DNA repair, and/or cell cycle checkpoint control. It is suggested that this gene may itself be a tumor suppressor acting in the same pathway as BRCA1. Three transcript variants encoding two different isoforms have been found for this gene. More transcript variants exist, but their full-length natures have not been determined. [provided by RefSeq, Jul 2008],
