

MYPC2 Monoclonal Antibody

type-III domains.,similarity:Contains 7 Ig-like C2-type (immunoglobulin-like) domains., Background This gene encodes a member of the myosin-binding protein C family. This family includes the fast-, slow- and cardiac-type isoforms, each of which is a		
Reactivity Human;Rat;Mouse; Applications WB Gene Name MYBPC2 MYBPCF Protein Name Myosin-binding protein C, fast-type (Fast MyBP-C) (C-protein, skeletal muscle fast isoform) Immunogen Synthesized peptide derived from human protein . at AA range: 560-640 Specificity MYPC2 Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse,IgG Purlfication The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-1:2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 125kD Cell Pathway cytosol,myosin filament, Tissue Specificity Epithelium,Fetal skeletal muscle,Pooled, Function function:Thick filament-associated protein located in the crossbridge region of vertebrate striated muscle a bands. In vitro it binds MHC, F-actin and native thin filaments, and modifies the activity of actin-activated myosin ATPase. It modulate muscle contraction or may play a more structural role, similarity. Belongs to the immunoglobulin superfamily. MyBP family, similarity. Contains 3 fifonectin year-liquid on mains, similarity. Contains 3 (Fig-like C2-type (immunoglobulin-like) domains. This gene encodes a member of the myosin-binding protein C family. This family includes the fast-, slow- and cardiac-type isoforms, each of which is a myosin-associated protein found in the cross-bridge-bearing zone (C region) of A bands in striated muscle. The protein encoded by this locus is referred to as the fast-type isoform. Mutations in the related but distinct genes encoding the slow-type and cardiac-type isoforms have been associated with distal arthrogryposis, type 1 and hypertrophic cardiomyopathy, respectively. [provided	Catalog No	YP-mAb-05774
Applications WB Gene Name MYBPC2 MYBPCF Protein Name Myosin-binding protein C, fast-type (Fast MyBP-C) (C-protein, skeletal muscle fast isoform) Immunogen Synthesized peptide derived from human protein . at AA range: 560-640 Specificity MYPC2 Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.
