

UBP1 Monoclonal Antibody

Catalog No YP-mAb-06333 Isotype IgG Reactivity Human;Rat;Mouse; Applications WB Gene Name USP1 Protein Name Ubiquitin carboxyl-terminal hydrolase 1 (EC 3.4.19.12) (Deubiquitinating enzyme 1) (hUBP) (Ubiquitin thioesterase 1) (Ubiquitin-specific-processing protease 1) Immunogen Synthesized peptide derived from part region of human protein Specificity UBP1 Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse,IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-1:2000 Concentration 1 mg/ml Purity 290% Storage Stability -20°C/1 year Synonyms Observed Band 86kD Cell Pathway Nucleus . Tissue Specificity Brain,Epithelium,Eye,Fetal brain,Testis,Uterus, Function catalytic activity:Ubiquitin C-terminal thioester + H(2)O = ubiquitin + a thiol., developmental stage:Cell cycle-regulated. Highest level during S phase,function. Negati		
Reactivity Human;Rat;Mouse; Applications WB Gene Name USP1 Protein Name Ubiquitin carboxyl-terminal hydrolase 1 (EC 3.4.19.12) (Deubiquitinating enzyme 1) (hUBP) (Ubiquitin thioesteriase 1) (Ubiquitin-specific-processing protease 1) Immunogen Synthesized peptide derived from part region of human protein Specificity UBP1 Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse, lgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-1:2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 86kD Cell Pathway Nucleus . Tissue Specificity Brain, Epithelium, Eye, Fetal brain, Testis, Uterus, catalytic activity: Ubiquitin C-terminal thioester + H(2)O = ubiquitin + a thiol. developmental stage: Cell cycle-regulated. Highest level during S phase, function: Negative regulator of DNA damage repair. Autocatalytic cleavage of USP1 leads to an increase in ubiquitinated DCNA, recruitment of POLH and translesion synthesis following DNA damage. Regulates ubiquitination of FANCD2 _miscellaneous:HER/293T cells expressing reduced levels of USP1 show a higher level of ubiquitinated. Degraded by the proteasome, sequence caution: Contaminating sequence. Potential poly-A sequence. similarity:Belongs	Catalog No	YP-mAb-06333

Thank you for your recent purchase

Background

This gene encodes a member of the ubiquitin-specific processing (UBP) family of proteases that is a deubiquitinating enzyme (DUB) with His and Cys domains. This protein is located in the cytoplasm and cleaves the ubiquitin moiety from ubiquitin-fused precursors and ubiquitinylated proteins. The protein specifically

UpingBio technology Co.,Ltd

deubiquitinates a protein in the Fanconi anemia (FA) DNA repair pathway. Alternate transcriptional splice variants have been characterized. [provided by RefSeq, Jul 2008],

matters needing attention

Avoid repeated freezing and thawing!

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
