GST-Pi (ABT256) Mouse mAb

Gene Name GSTP1 FAEES3 GST3 Protein Name Deafness; Deafness X-linked 7; DFN7; FAEES3; Fatty Acid Ethyl Ester Synthase III, Glutathione S Transferase 9, Glutathione S Transferase Pi, Glutathione S-transferase P, Glutathione S Transferase pi 1; GST da Immunogen Synthesized peptide derived from human GST-Pi Specificity The antibody can specifically recognize human GST-Pi protein. Formulation PBS, pH7.2, 0.03% Porcolin 300, containing stabilizing protein Source Monoclonal Mouse IgG2b, Kappa Purification The antibody was affinity-purified from mouse ascites by affinity-chromatography using specific immunogen. Dilution IHC-p 1:200-400, WB 1:200-1000, Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Deafness;Deafness X-linked 7;DFN7;FAEES3;Fatty Acid Ethyl Ester Synthase III;Glutathione S Transferase 3;Glutathione S Transferase Pi;Glutathione S-transferase P;Glutathione S Transferase pi;GST Observed Band		
Reactivity Human;Mouse;Rat Applications IHC;WB; Gene Name GSTP1 FAEES3 GST3 Protein Name Deafness;Deafness X.linked 7;DFN7;FAEES3;Fatty Acid Ethyl Ester Synthase III;Glutathione S Transferase 3;Glutathione S Transferase PI;Glutathione S-transferase P;Glutathione S-transferase p1 1;GST cla Immunogen Synthesized peptide derived from human GST-Pi Specificity The antibody can specifically recognize human GST-Pi protein. 	categorized into 4 main classes: alpha, mu, pi, and theta. This GST family member is a polymorphic gene encoding active, functionally different GSTP1 variant proteins that are thought to function in xenobiotic metabolism and play a role in susceptibility to cancer, and other diseases. Human esophageal squamous cell carcinoma tissue was stained with Anti-GST-Pi (ABT256) Antibody

Hela whole cell lysates were separated by 10% SDS-PAGE, and the membrane was blotted with anti-GST-Pi(ABT256) antibody. The HRP-conjugated Goat anti-Mouse IgG(H + L) antibody was used to detect the antibody. Lane 1: Hela Predicted band size: 23kDa Observed band size: 23kDa
