

Brn-3a Polyclonal Antibody

Catalog No	YP-Ab-15749
Isotype	IgG
Reactivity	Human;Mouse;Rat
Applications	WB;ELISA
Gene Name	POU4F1
Protein Name	POU domain class 4 transcription factor 1
Immunogen	The antiserum was produced against synthesized peptide derived from human POU4F1. AA range:311-360
Specificity	Brn-3a Polyclonal Antibody detects endogenous levels of Brn-3a protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Polyclonal, Rabbit,IgG
Purification	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	Western Blot: 1/500 - 1/2000. ELISA: 1/5000. Not yet tested in other applications.
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	POU4F1; BRN3A; RDC1; POU domain; class 4, transcription factor 1; Brain-specific homeobox/POU domain protein 3A; Brain-3A; Brn-3A; Homeobox/POU domain protein RDC-1; Oct-T1
Observed Band	42kD
Cell Pathway	Nucleus . Cytoplasm .
Tissue Specificity	Expressed in the brain and the retina. Present in the developing brain, spinal cord and eye.
Function	developmental stage:Expression peaks early in embryogenesis (day 13.5) and is undetectable 14 days after birth.,function:Probable transcription factor which may play a role in the regulation of specific gene expression within a subset of neuronal lineages. May play a role in determining or maintaining the identities of a small subset of visual system neurons.,similarity:Belongs to the POU transcription factor family. Class-4 subfamily.,similarity:Contains 1 homeobox DNA-binding domain.,similarity:Contains 1 POU-specific domain.,tissue specificity:Brain. Seems to be specific to the retina. Present in the developing brain, spinal cord and eye.,
Background	This gene encodes a member of the POU-IV class of neural transcription factors. This protein is expressed in a subset of retinal ganglion cells and may be involved in the developing sensory nervous system. This protein may also promote the

growth of cervical tumors. A translocation of this gene is associated with some adult acute myeloid leukemias. [provided by RefSeq, Mar 2012],
