TGFβ3 Polyclonal Antibody

Tissue Specificity Amygdala,Esophageal,Placenta,Prostate, disease:Defects in TGFB3 are a cause of familial arrhythmogenic right ventricular dysplasia 1 (ARVD1) [MIM:107970]; also known as arrhythmogenic right		
Reactivity Human;Mouse;Rat;Monkey Applications WB;IHC;IF;ELISA Gene Name TGFB3 Protein Name Transforming growth factor beta-3 Immunogen The antiserum was produced against synthesized peptide derived from human TGF beta3. AA range;261-310 Specificity TGFβ3 Polyclonal Antibody detects endogenous levels of TGFβ3 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB: 1/500 - 1/2000. IHC: 1/100 - 1/300. ELISA: 1/10000 IF 1:50-200 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms TGFB3; Transforming growth factor beta-3; TGF-beta-3 Observed Band 47kDa/58kDa Cell Pathway Latency-associated peptide]: Secreted, extracellular space, extracellular matrix insured by a specificity Function disease: Defects in TGFB3 are a cause of familial arrhythmogenic right ventricular dysplasia 1 (ARVD1) [MIM: 107970]; also known as arrhythmogenic right ventricular dysplasia 1 (ARVD1) [MIM: 107970]; also known as a mythythmogenic ri	Catalog No	YP-Ab-15968
Applications WB;HC;IF;ELISA Gene Name TGFB3 Protein Name Transforming growth factor beta-3 Immunogen The antiserum was produced against synthesized peptide derived from human TGF beta3. AA range:261-310 Specificity TGFβ3 Polyclonal Antibody detects endogenous levels of TGFβ3 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB: 1/500 - 1/2000. IHC: 1/100 - 1/300. ELISA: 1/10000 IF 1:50-200 Concentration 1 mg/ml Purity 290% Storage Stability -20°C/1 year Synonyms TGFB3; Transforming growth factor beta-3; TGF-beta-3 Observed Band 47kDa/58kDa Cell Pathway [Latency-associated peptide]: Secreted, extracellular space, extracellular matrix. Transforming growth factor beta-3]: Secreted. Tissue Specificity Amygdala, Esophageal, Placenta, Prostate, Function disease: Defects in TGFB3 are a cause of familial arrhythmogenic right ventricular dysplasia 1 (ARVD1) [MIM:107970]; also known as arrhythmogenic right ventricular cardiomyopathy 1 (ARVD1). ARVD is an autosomal dominant disease characterized by partial degeneration of the myocardium of the right ventricular additional disease characterized by partial degeneration of the myocardium of the right ventricular in the situation of the right ventricular in the myocardium of the right ventricular decentical myocardium with fatty ordineria, pathologic findings, replacement of Ventricular myocardium with fatty and fibrous elements, preferentially involved the myocardium of the right ventricle, electrical instability, and fibrous elements, preferentially involved the fight ventricle are encodes a secreted ligand of the TGF-beta (transforming growth factor-beta) superfamily of proteins. Ligands of this family bind various TGF-beta receptors leading to recruitment and activation of SMAD family transcription	Isotype	IgG

proteolytically processed to generate a latency-associated peptide (LAP) and a mature peptide, and is found in either a latent form composed of a mature peptide homodimer, a LAP homodimer, and a latent TGF-beta binding protein, or in an active form consisting solely of the mature peptide homodimer. The mature peptide may also form heterodimers with other TGF-beta family members. This protein is involved in embryogenesis and cell differentiation, and may play a role in wound hooling. Mutations in this game are a course of partia angular and in wound healing. Mutations in this gene are a cause of aortic aneurysms and dissections, as well as familial arrhythmogenic
