

## GABA T-3 Polyclonal Antibody

Catalog No         YP-Ab-12724           Isotype         IgG           Reactivity         Human;Mouse;Rat           Applications         WB;ELISA           Gene Name         SLC6A11           Protein Name         Sodium- and chloride-dependent GABA transporter 3           Immunogen         Synthesized peptide derived from GABA T-3 . at AA range: 370-450           Specificity         GABA T-3 Polyclonal Antibody detects endogenous levels of GABA T-3 protein.           Formulation         Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.           Source         Polyclonal, Rabbit, IgG           Purification         The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.           Dilution         Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications.           Concentration         1 mg/ml           Purity         ≥90%           Storage Stability         -20°C/1 year           Synonyms         SLC6A11; GABT3; GAT3; Sodium- and chloride-dependent GABA transporter 3; GAT-3; Solute carrier family 6 member 11           Observed Band         70kD           Cell Pathway         Membrane; Multi-pass membrane protein.           Tissue Specificity         Widespread distribution in the brain. <th></th> <th></th>		
Reactivity Human;Mouse;Rat  Applications WB;ELISA  Gene Name SLC6A11  Protein Name Sodium- and chloride-dependent GABA transporter 3  Immunogen Synthesized peptide derived from GABA T-3 . at AA range: 370-450  Specificity GABA T-3 Polyclonal Antibody detects endogenous levels of GABA T-3 protein.  Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source Polyclonal, Rabbit, IgG  Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications.  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms SLC6A11; GABT3; GAT3; Sodium- and chloride-dependent GABA transporter 3; GAT-3; Solute carrier family 6 member 11  Observed Band 70kD  Cell Pathway Membrane; Multi-pass membrane protein.  Tissue Specificity Widespread distribution in the brain.  Function function:Terminates the action of GABA by its high affinity sodium-dependent reuptake into presynaptic terminals, similarity. Belongs to the sodium-neurotransmitter symporter (SNF) family, tissue specificity:Widespread distribution in the brain.  The protein encoded by this gene is a sodium-dependent transporter that uptakes gamma-aminobutyric acid (GABA), an inhibitory neurotransmitter, which behavior all problems, or intellectual problems. Two transcript versuit in epipery, behavior all problems, or intellectual problems. Two transcript versuit in epipery, behavior all problems, or intellectual problems. Two transcript versuit in epipery.  Avoid repeated freezing and thawing!	Catalog No	YP-Ab-12724
Applications WB;ELISA  Gene Name SLC6A11  Protein Name Sodium- and chloride-dependent GABA transporter 3  Immunogen Synthesized peptide derived from GABA T-3 . at AA range: 370-450  Specificity GABA T-3 Polyclonal Antibody detects endogenous levels of GABA T-3 protein.  Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source Polyclonal, Rabbit,IgG  Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications.  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms SLC6A11; GABT3; GAT3; Sodium- and chloride-dependent GABA transporter 3; GAT-3; Solute carrier family 6 member 11  Observed Band 70kD  Cell Pathway Membrane; Multi-pass membrane protein.  Tissue Specificity Widespread distribution in the brain.  Function function: Terminates the action of GABA by its high affinity sodium-dependent reuptake into presynaptic terminals, similarity. Belongs to the sodium-neurotransmitter symporter (SNF) family, lissue specificity. Widespread distribution in the brain.  Background The protein encoded by this gene is a sodium-dependent transporter that uptakes gamma-aminobutyric acid (GABA), an inhibitory neurotransporter that uptakes gamma-aminobutyric acid (GABA), an inhibitory neurotransporter with epilepsy, behavioral problems, or intellectual problems. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Dec 2015], Avoid repeated freezing and thawing!	Isotype	IgG
Gene Name SLC6A11  Protein Name Sodium- and chloride-dependent GABA transporter 3  Immunogen Synthesized peptide derived from GABA T-3 . at AA range: 370-450  Specificity GABA T-3 Polyclonal Antibody detects endogenous levels of GABA T-3 protein.  Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source Polyclonal, Rabbit, IgG  Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications.  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms SLC6A11; GABT3; GAT3; Sodium- and chloride-dependent GABA transporter 3; GAT-3; Solute carrier family 6 member 11  Observed Band 70kD  Cell Pathway Membrane; Multi-pass membrane protein.  Tissue Specificity Widespread distribution in the brain.  Function function: Terminates the action of GABA by its high affinity sodium-dependent reuptake into pressynaptic terminals, similarity; Belongs to the sodium: neurotransmitter symporter (SNF) family. Lissue specificity: Widespread distribution in the brain.,  The protein encoded by this gene is a sodium-dependent transporter that uptakes gamma-aminobutyric acid (GABA), an inhibitory neurotransmitter, which ends the GABA neurotransmiston. Defects in this gene may result in epilepsy, behavioral problems, or intellectual problems. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Dec 2015],	Reactivity	Human;Mouse;Rat
Protein Name         Sodium- and chloride-dependent GABA transporter 3           Immunogen         Synthesized peptide derived from GABA T-3 . at AA range: 370-450           Specificity         GABA T-3 Polyclonal Antibody detects endogenous levels of GABA T-3 protein.
