## Olfactory receptor O13C2/9 Polyclonal Antibody

YP-Ab-13648
lgG
Human;Rat;Mouse;
WB;IF;ELISA
OR13C2/OR13C9
Olfactory receptor 13C2/9
The antiserum was produced against synthesized peptide derived from human OR13C2/13C9. AA range:232-281
Olfactory receptor O13C2/9 Polyclonal Antibody detects endogenous levels of Olfactory receptor O13C2/9 protein.
Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Polyclonal, Rabbit,IgG
The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Western Blot: 1/500 - 1/2000. Immunofluorescence: 1/200 - 1/1000. ELISA: 1/20000. Not yet tested in other applications.
1 mg/ml
≥90%
-20°C/1 year
OR13C2; Olfactory receptor 13C2; Olfactory receptor OR9-12; OR13C9; Olfactory receptor 13C9; Olfactory receptor OR9-13
36kD
Cell membrane; Multi-pass membrane protein.
function:Odorant receptor .,similarity:Belongs to the G-protein coupled receptor 1 family.,
Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms. [provided by RefSeq, Jul 2008],

Avoid repeated freezing and thawing!
