

CRBP II Monoclonal Antibody

Catalog No	YP-mAb-00768
Isotype	IgG
Reactivity	Human;Mouse;Rat
Applications	WB
Gene Name	RBP2
Protein Name	Retinol-binding protein 2
Immunogen	The antiserum was produced against synthesized peptide derived from the Internal region of human RBP2. AA range:71-120
Specificity	CRBP II Monoclonal Antibody detects endogenous levels of CRBP II protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	RBP2; CRBP2; Retinol-binding protein 2; Cellular retinol-binding protein II; CRBP-II
Observed Band	15kD
Cell Pathway	Cytoplasm.
Tissue Specificity	Higher expression in adult small intestine and to a much lesser extent in fetal kidney.
Function	domain:Forms a beta-barrel structure that accommodates hydrophobic ligands in its interior.,function:Intracellular transport of retinol.,similarity:Belongs to the calycin superfamily. Fatty-acid binding protein (FABP) family.,tissue specificity:Higher expression in adult small intestine and to a much lesser extent in fetal kidney.,
Background	retinol binding protein 2(RBP2) Homo sapiens This gene encodes an abundant protein present in the small intestinal epithelium. It is thought to participate in the uptake and/or intracellular metabolism of vitamin A. Vitamin A is a fat-soluble vitamin necessary for growth, reproduction, differentiation of epithelial tissues, and vision. This protein may also modulate the supply of retinoic acid to the nuclei of endometrial cells during the menstrual cycle. [provided by RefSeq, Aug 2015],
