Endo G-L1 Monoclonal Antibody

Catalog No	YP-mAb-02633
Isotype	IgG
Reactivity	Human;Rat;Mouse;
Applications	WB
Gene Name	EXOG
Protein Name	Nuclease EXOG mitochondrial
Immunogen	The antiserum was produced against synthesized peptide derived from human ENDOGL1. AA range:171-220
Specificity	Endo G-L1 Monoclonal Antibody detects endogenous levels of Endo G-L1 protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	EXOG; ENDOGL1; ENDOGL2; ENGL; Nuclease EXOG; mitochondrial; Endonuclease G-like 1; Endo G-like 1
Observed Band	41kD
Cell Pathway	Mitochondrion inner membrane .
Tissue Specificity	Ubiquitous.
Function	cofactor:Divalent metal cations.,function:Endo/exonuclease with nicking activity towards supercoiled DNA, a preference for single stranded DNA and 5'-3' exonuclease activity.,miscellaneous:The active site contains 1 hydrated divalent metal cation that has only 1 direct interaction with the protein; all other interactions are via water molecules.,similarity:Belongs to the DNA/RNA non-specific endonuclease family.,subunit:Homodimer.,tissue specificity:Ubiquitous.,
Background	This gene encodes an endo/exonuclease with 5'-3' exonuclease activity. The encoded enzyme catalyzes the hydrolysis of ester linkages at the 5' end of a nucleic acid chain. This enzyme is localized to the mitochondria and may play a role in programmed cell death. Alternatively spliced transcript variants have been described. A pseudogene exists on chromosome 18. [provided by RefSeq, Feb 2009],

matters needing attention	Avoid repeated freezing and thawing!
Usage suggestions	This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
