

## MARCKS Monoclonal Antibody

Catalog No	YP-mAb-03951
Isotype	IgG
Reactivity	Human;Mouse;Rat
Applications	WB
Gene Name	MARCKS
Protein Name	Myristoylated alanine-rich C-kinase substrate
Immunogen	The antiserum was produced against synthesized peptide derived from human MARCKS. AA range:126-175
Specificity	MARCKS Monoclonal Antibody detects endogenous levels of MARCKS protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	MARCKS; MACS; PRKCSL; Myristoylated alanine-rich C-kinase substrate; MARCKS; Protein kinase C substrate; 80 kDa protein, light chain; 80K-L protein; PKCSL
Observed Band	31kD
Cell Pathway	Cytoplasm, cytoskeleton . Membrane ; Lipid-anchor .
Tissue Specificity	Blood,Brain,Epithelium,Muscle,Skin,
Function	function:MARCKS is the most prominent cellular substrate for protein kinase C. This protein binds calmodulin, actin, and synapsin. MARCKS is a filamentous (F) actin cross-linking protein.,PTM:Phosphorylation by PKC displaces MARCKS from the membrane. It also inhibits the F-actin cross-linking activity.,similarity:Belongs to the MARCKS family.,
Background	The protein encoded by this gene is a substrate for protein kinase C. It is localized to the plasma membrane and is an actin filament crosslinking protein. Phosphorylation by protein kinase C or binding to calcium-calmodulin inhibits its association with actin and with the plasma membrane, leading to its presence in the cytoplasm. The protein is thought to be involved in cell motility, phagocytosis, membrane trafficking and mitogenesis. [provided by RefSeq, Jul 2008],
