

MRP-L50 Monoclonal Antibody

Catalog No	YP-mAb-03999
Isotype	IgG
Reactivity	Human;Rat;Mouse;
Applications	WB
Gene Name	MRPL50
Protein Name	39S ribosomal protein L50 mitochondrial
Immunogen	The antiserum was produced against synthesized peptide derived from human MRPL50. AA range:109-158
Specificity	MRP-L50 Monoclonal Antibody detects endogenous levels of MRP-L50 protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	MRPL50; 39S ribosomal protein L50; mitochondrial; L50mt; MRP-L50
Observed Band	22kD
Cell Pathway	Mitochondrion .
Tissue Specificity	Carcinoma,Epithelium,Hepatoma,Skin,
Function	
Background	Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in protein synthesis within the mitochondrion. Mitochondrial ribosomes (mitoribosomes) consist of a small 28S subunit and a large 39S subunit. They have an estimated 75% protein to rRNA composition compared to prokaryotic ribosomes, where this ratio is reversed. Another difference between mammalian mitoribosomes and prokaryotic ribosomes is that the latter contain a 5S rRNA. Among different species, the proteins comprising the mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which prevents easy recognition by sequence homology. This gene encodes a putative 39S subunit protein and belongs to the L47P ribosomal protein family. Pseudogenes corresponding to this gene are found on chromosomes 2p, 2q, 5p, and 10q.
