

MRP-L35 Monoclonal Antibody

Catalog No	YP-mAb-04346
Isotype	IgG
Reactivity	Human;Mouse
Applications	WB
Gene Name	MRPL35
Protein Name	39S ribosomal protein L35 mitochondrial
Immunogen	Synthesized peptide derived from MRP-L35 . at AA range: 80-160
Specificity	MRP-L35 Monoclonal Antibody detects endogenous levels of MRP-L35 protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	MRPL35; BM-007; 39S ribosomal protein L35, mitochondrial; L35mt; MRP-L35
Observed Band	21kD
Cell Pathway	Mitochondrion .
Tissue Specificity	Bone marrow,Liver,Stomach,
Function	similarity:Belongs to the ribosomal protein L35P family.,
Background	Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in protein synthesis within the mitochondrion. Mitochondrial ribosomes (mitoribosomes) consist of a small 28S subunit and a large 39S subunit. They have an estimated 75% protein to rRNA composition compared to prokaryotic ribosomes, where this ratio is reversed. Another difference between mammalian mitoribosomes and prokaryotic ribosomes is that the latter contain a 5S rRNA. Among different species, the proteins comprising the mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which prevents easy recognition by sequence homology. This gene encodes a 39S subunit protein. Sequence analysis identified three transcript variants. Pseudogenes corresponding to this gene are found on chromosomes 6p, 10q, and Xp. [provided by RefSeq, Jul 2008],
