affinity-chromatography using epitope-specific immunogen.  Dilution WB 1:500-1:2000  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms Cystatin-A (Cystatin-AS;Stefin-A)
Concentration       1 mg/ml         Purity       ≥90%         Storage Stability       -20°C/1 year         Synonyms       Cystatin-A (Cystatin-AS;Stefin-A)
Purity       ≥90%         Storage Stability       -20°C/1 year         Synonyms       Cystatin-A (Cystatin-AS;Stefin-A)
Storage Stability -20°C/1 year  Synonyms Cystatin-A (Cystatin-AS;Stefin-A)
Synonyms Cystatin-A (Cystatin-AS;Stefin-A)
Observed Band 11kD
Cell Pathway Cytoplasm .
Tissue Specificity Expressed in the skin throughout the epidermis.
<b>Function</b> function: This is an intracellular thiol proteinase inhibitor., similarity: Belongs to the cystatin family.,
The cystatin superfamily encompasses proteins that contain multiple cystatin-like sequences. Some of the members are active cysteine protease inhibitors, while others have lost or perhaps never acquired this inhibitory activity. There are three inhibitory families in the superfamily, including the type 1 cystatins (stefins), type 2 cystatins, and kininogens. This gene encodes a stefin that functions as a cysteine protease inhibitor, forming tight complexes with papain and the cathepsins B, H, and L. The protein is one of the precursor proteins of cornified cell envelope in keratinocytes and plays a role in epidermal development and maintenance. Stefins have been proposed as prognostic and diagnostic tools for cancer. [provided by RefSeq, Jul 2008],
matters needing Avoid repeated freezing and thawing! attention
