

NDUB3 Monoclonal Antibody

Catalog No YP-mAb-05799 Isotype IgG Reactivity Human;Mouse Applications WB Gene Name NDUFB3 Protein Name NADH dehydrogenase [ubiquinone] 1 beta subcomplex subunit 3 (Complex I-B12) (CI-B12) (NADH-ubiquinone oxidoreductase B12 subunit) Immunogen Synthesized peptide derived from human protein . at AA range: 40-120 Specificity NDUB3 Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-1:2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 10kD Cell Pathway Mitochondrion inner membrane; Single-pass membrane protein; Matrix side . Tissue Specificity Heart, Lung. Function function: Accessory subunit of the mitochondrial membrane respiratory chain NaDH dehydrogenase (Complex I), that is believed to be not involved		
Reactivity Human; Mouse Applications WB Gene Name NDUFB3 Protein Name NADH dehydrogenase [ubiquinone] 1 beta subcomplex subunit 3 (Complex I-B12) (CI-B12) (NADH-ubiquinone oxidoreductase B12 subunit) Immunogen Synthesized peptide derived from human protein . at AA range: 40-120 Specificity NDUB3 Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-1:2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 10kD Cell Pathway Mitochondrion inner membrane; Single-pass membrane protein; Matrix side . Tissue Specificity Heart, Lung, Function Mitochondrion in the transfer of electrons from NADH to the respiratory chain. The immediate electron acceptor for the enzyme is believed to be ubiquinone. similarity. Belongs to the complex 1 NDUFB3 subunit armily, subunit. Complex 1 is composed of 45 different subunits. Background This gene encodes an accessory subunit of the mitochondrial membrane respiratory chain membrane of the mitochondrial of the mitochondrial membrane of the first enzyme in the electron transport chain of mitochondrial. This protein localizes to the inner membrane of the mitochondrial of 45 different subunits. Background	Catalog No	YP-mAb-05799
Applications Gene Name NDUFB3 Protein Name NADH dehydrogenase [ubiquinone] 1 beta subcomplex subunit 3 (Complex I-B12) (CI-B12) (NADH-ubiquinone oxidoreductase B12 subunit) Immunogen Synthesized peptide derived from human protein . at AA range. 40-120 Specificity NDUB3 Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-1:2000 Concentration 1 mg/ml Purity 290% Storage Stability -20°C/1 year Synonyms Observed Band 10kD Cell Pathway Mitochondrion inner membrane; Single-pass membrane protein; Matrix side. Tissue Specificity Heart,Lung, Function function-Accessory subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase (Complex I), that is believed to be not involved in catalysis. Complex I functions in the transfer of electrons from NADH to the respiratory chain. The immediate electron acceptor for the enzyme is believed to be ubiquinone, similarity Belongs to the complex I NDUFB3 subunit family., subunit:Complex I is composed of 45 different subunits. Background This gene encodes an accessory subunit of the mitochondrial membrane respiratory chain in the special complex I) which is the first enzyme in the electron transport chain of mitochondria. This protein localizes to the inner membrane of the mitochondria a single-pass membrane protein. Mutations in this gene contribute to mitochondrial complex I deficiency. Alternative splicing results in multiple transcript variants encoding the same protein. Mutations in this gene contribute to mitochondrial complex I deficiency. Alternative splicing	Isotype	IgG
Gene Name NDUFB3 Protein Name NADH dehydrogenase [ubiquinone] 1 beta subcomplex subunit 3 (Complex I-B12) (CI-B12) (NADH-ubiquinone oxidoreductase B12 subunit) Immunogen Synthesized peptide derived from human protein . at AA range: 40-120 Specificity NDUB3 Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-1:2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 10kD Cell Pathway Mitochondrion inner membrane; Single-pass membrane protein; Matrix side . Tissue Specificity Heart, Lung, Function function: Accessory subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase (Complex I), that is believed to be not involved in catalysis. Complex I function in the transfer of electrons from NADH to the respiratory chain. The immediate electron acceptor for the enzyme is believed to be ubiquinone, similarity:Belongs to the complex I NDUFB3 subunit family., subunit:Complex I is composed of 45 different subunits. Background This gene encodes an accessory subunit of the mitochondrial membrane respiratory chain in the segonatory chain of mitochondria. This protein localizes to the inner membrane of the mitochondria is a single-pass membrane protein. Mutations in this gene contribute to mitochondrial complex I) which is the first enzyme in the electron transport chain of mitochondria. This protein localizes to the inner membrane of the mitochondrial sensoning the same protein. Mutations in this gene contribute to mitochondrial complex I deficiency. Alternative splicing results in multiple transcript variants encoding the same protein. Mutations in this gene contribute to mitochondrial complex I deficiency.	Reactivity	Human;Mouse
Protein Name NADH dehydrogenase [ubiquinone] 1 beta subcomplex subunit 3 (Complex I-B12) (CI-B12) (NADH-ubiquinone oxidoreductase B12 subunit) Immunogen Synthesized peptide derived from human protein . at AA range: 40-120 Specificity NDUB3 Monoclonal Antibody detects endogenous levels of protein.
