

DKK4 Monoclonal Antibody

Catalog No YP-mAb-07162 Isotype IgG Reactivity Human;Mouse Applications WB Gene Name DKK4 Protein Name Dickkopf-related protein 4 short form] Immunogen Synthesized peptide derived from human protein .at AA range: 150-230 Specificity DKK4 Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-1:2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 24kD Cell Pathway Secreted. Tissue Specificity Expressed in cerebellum, T-cells, esophagus and lung. Function function:Inhibitor of Wnt signaling pathway.,PTM:Appears to be not glycosylated.,PTM:Can be proteelytically processed by a furin-like protease, similarity:Belongs to the dickkopf family, tissue specificity:Expressed in cerebellum, T-cells, esophagus and lung. <t< th=""><th></th><th></th></t<>		
Reactivity Human;Mouse Applications WB Gene Name DKK4 Protein Name Dickkopf-related protein 4 (Dickkopf-4) (Dkk-4) (hDkk-4) [Cleaved into: Dickkopf-related protein 4 short form] Immunogen Synthesized peptide derived from human protein . at AA range: 150-230 Specificity DKK4 Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-1:2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 24kD Cell Pathway Secreted. Tissue Specificity Expressed in cerebellum, T-cells, esophagus and lung. Function function:Inhibitor of Wnt signaling pathway.,PTM:Appears to be not glycosylated,.PTM:Can be proteolytically processed by a furin-like protease, similarity:Belongs to the dickkopf family, tissue specificity:Expressed in cerebellum, T-cells, esophagus and lung. Background This gene encodes a protein that is a member of the dickkopf family. The secreted protein contains two cysteine rich regions and is involved in embryonic development through its interactions with the Writt signaling pathway. Activity of this protein is modulated by binding to the Writ signaling pathway. Activity of this protein is modulated by binding to the Writt signaling pathway. Activity of this protein is modulated by binding to the Writt signaling pathway. Activity of this protein is modulated by binding to the Writt signaling pathway. Activity of this protein is modulated by binding to the Writt signaling pathway. Activity of this protein is modulated by binding to the Writt signaling pathway. Activity of this protein is modulated by binding to the Writt signaling pathway. Activity of this protein is modulated by binding to the Writt signaling pathway. Activity of this protein is modulated by binding to the Writt signaling pathway. Activity of this	Catalog No	YP-mAb-07162
Applications WB Gene Name DKK4 Protein Name Dickkopf-related protein 4 (Dickkopf-4) (Dkk-4) (hDkk-4) [Cleaved into: Dickkopf-related protein 4 short form] Immunogen Synthesized peptide derived from human protein . at AA range: 150-230 Specificity DKK4 Monoclonal Antibody detects endogenous levels of protein.
