

KGFL1 Monoclonal Antibody

Catalog No	YP-mAb-07292
Isotype	IgG
Reactivity	Human;Rat;Mouse;
Applications	WB
Gene Name	KGFLP1
Protein Name	Putative keratinocyte growth factor-like protein 1 (KGF-like protein 1)
Immunogen	Synthesized peptide derived from human protein . at AA range: 41-90
Specificity	KGFL1 Monoclonal Antibody detects endogenous levels of protein.
Formulation	Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	
Observed Band	10kD
Cell Pathway	
Tissue Specificity	
Function	ovarian follicle development, tissue homeostasis, hair follicle development, reproductive developmental process, cellular amino acid derivative metabolic process, biogenic amine metabolic process, phospholipid metabolic process, glycerophospholipid metabolic process, phosphatidylcholine biosynthetic process, ectoderm development, sex differentiation, positive regulation of cell proliferation, gonad development, epidermis development, female gonad development, lipid biosynthetic process, phospholipid biosynthetic

development, lipid biosynthetic process, phospholipid biosynthetic process, response to wounding, organophosphate metabolic process, molting cycle process, hair cycle process, ovulation cycle process, respiratory tube

development, lung development, hair follicle morphogenesis, multicellular organism reproduction, tube development, wound healing, regulation of cell

proliferation, molting cycle, ethanolamine and derivative metabolic

process, homeostat

Background

UpingBio technology Co.,Ltd

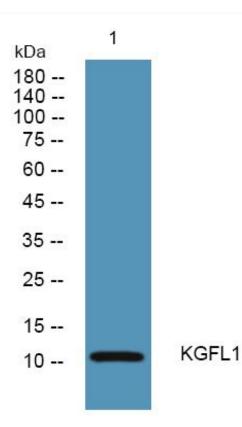

matters needing attention

Avoid repeated freezing and thawing!

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
