

AGTR2 Monoclonal Antibody

Catalog No	YP-mAb-07361
Isotype	IgG
Reactivity	Human;Mouse
Applications	WB
Gene Name	AGTR2
Protein Name	Type-2 angiotensin II receptor (Angiotensin II type-2 receptor) (AT2)
Immunogen	Synthesized peptide derived from human protein . at AA range: 30-110
Specificity	AGTR2 Monoclonal Antibody detects endogenous levels of protein.
Formulation	Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	
Observed Band	39kD
Cell Pathway	Cell membrane; Multi-pass membrane protein.
Tissue Specificity	In adult, highly expressed in myometrium with lower levels in adrenal gland and fallopian tube. Expressed in the cerebellum. Very highly expressed in fetal kidney and intestine.
Function	function:Receptor for angiotensin II. Cooperates with MTUS1 to inhibit ERK2 activation and cell proliferation.,similarity:Belongs to the G-protein coupled receptor 1 family.,subunit:Interacts with MTUS1.,tissue specificity:In adult, highly expressed in myometrium with lower levels in adrenal gland and fallopian tube. Very highly expressed in fetal kidney and intestine.,
Background	The protein encoded by this gene belongs to the G-protein coupled receptor 1 family, and functions as a receptor for angiotensin II. It is an intergral membrane protein that is highly expressed in fetus, but scantily in adult tissues, except brain, adrenal medulla, and atretic ovary. This receptor has been shown to mediate programmed cell death and this apoptotic function may play an important role in developmental biology and pathophysiology. Mutations in this gene are been associated with X-linked mental retardation. [provided by RefSeq, Jan 2010],
