

ACPM Monoclonal Antibody

in the transfer of electrons from NADH to the respiratory chain., similarity:Con 1 acyl carrier domain., subunit:Mammalian complex I is composed of 45 differ subunits., Background function:Carrier of the growing fatty acid chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membres respiratory chain NADH dehydrogenase (Complex I), which functions in the		
Reactivity Human;Mouse Applications WB Gene Name NDUFAB1 Protein Name Acyl carrier protein, mitochondrial (ACP) (CI-SDAP) (NADH-ubiquinone oxidoreductase 9.6 kDa subunit) Immunogen Synthesized peptide derived from part region of human protein Specificity ACPM Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-1:2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 17kD Cell Pathway Mitochondrion Tissue Specificity Skin, Function function:Carrier of the growing fatty acid chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrane respiratory chain XADH dehydrogenase (Complex I), which function in the transfer of electrons from NADH to the respiratory chain, similarity. Contains in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrespiratory chain Accessory and non-cat	Catalog No	YP-mAb-07817
Applications Gene Name NDUFAB1 Protein Name Acyl carrier protein, mitochondrial (ACP) (CI-SDAP) (NADH-ubiquinone oxidoreductase 9.6 kDa subunit) Immunogen Synthesized peptide derived from part region of human protein Specificity ACPM Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-1:2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 17kD Cell Pathway Mitochondrion. Tissue Specificity Skin, function: Carrier of the growing fatty acid chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase (Complex I), which function in the transfer of electrons from NADH to the respiratory chain in fatty acid bosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase (Complex I), which function in the transfer of electrons from NADH to the respiratory chain similarity: Contains 1 transfer of electrons from NADH to the respiratory chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrane respiratory chain. milarity: Contains 1 transfer of electrons from NADH to the respiratory chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrane respiratory chain. milarity: Contains 1 transfer of electrons from NADH to the respiratory chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrane respiratory chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrane respiratory chain. similarity: Contains 1 transfer of the g	Isotype	IgG

Concentration	1 mg/ml
Synonyms Observed Band 17kD Cell Pathway Mitochondrion . Tissue Specificity Skin, Function function: Carrier of the growing fatty acid chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase (Complex I), which functin the transfer of electrons from NADH to the respiratory chain., similarity: Con 1 acyl carrier domain., subunit: Mammalian complex I is composed of 45 differ subunits., Background function: Carrier of the growing fatty acid chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrespiratory chain NADH dehydrogenase (Complex I), which functions in the transfer of electrons from NADH to the respiratory chain, similarity: Contains 1 carrier domain., subunit: Mammalian complex I is composed of 45 different subunits., matters needing Avoid repeated freezing and thawing!	Purity	≥90%
Observed Band Cell Pathway Mitochondrion . Tissue Specificity Skin, Function function:Carrier of the growing fatty acid chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase (Complex I), which functin the transfer of electrons from NADH to the respiratory chain.,similarity:Con 1 acyl carrier domain.,subunit:Mammalian complex I is composed of 45 differ subunits., Background function:Carrier of the growing fatty acid chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrace privatory chain NADH dehydrogenase (Complex I), which functions in the transfer of electrons from NADH to the respiratory chain.,similarity:Contains 1 carrier domain.,subunit:Mammalian complex I is composed of 45 different subunits., matters needing Avoid repeated freezing and thawing!	Storage Stability	-20°C/1 year
Cell Pathway Mitochondrion . Skin, Function function: Carrier of the growing fatty acid chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase (Complex I), which function in the transfer of electrons from NADH to the respiratory chain., similarity: Con a carrier domain., subunit: Mammalian complex I is composed of 45 differ subunits., Background function: Carrier of the growing fatty acid chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membranespiratory chain NADH dehydrogenase (Complex I), which functions in the transfer of electrons from NADH to the respiratory chain., similarity: Contains 1 carrier domain., subunit: Mammalian complex I is composed of 45 different subunits., matters needing Avoid repeated freezing and thawing!	Synonyms	
Tissue Specificity Skin, function: Carrier of the growing fatty acid chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase (Complex I), which function the transfer of electrons from NADH to the respiratory chain.,similarity:Con 1 acyl carrier domain.,subunit:Mammalian complex I is composed of 45 differ subunits., Background function:Carrier of the growing fatty acid chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrespiratory chain NADH dehydrogenase (Complex I), which functions in the transfer of electrons from NADH to the respiratory chain.,similarity:Contains 1 carrier domain.,subunit:Mammalian complex I is composed of 45 different subunits., matters needing Avoid repeated freezing and thawing!	Observed Band	17kD
Function function:Carrier of the growing fatty acid chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase (Complex I), which function the transfer of electrons from NADH to the respiratory chain., similarity:Con 1 acyl carrier domain., subunit:Mammalian complex I is composed of 45 differ subunits., function:Carrier of the growing fatty acid chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial membranespiratory chain NADH dehydrogenase (Complex I), which functions in the transfer of electrons from NADH to the respiratory chain., similarity:Contains 1 carrier domain., subunit:Mammalian complex I is composed of 45 different subunits., matters needing Avoid repeated freezing and thawing!	Cell Pathway	Mitochondrion .
mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase (Complex I), which function the transfer of electrons from NADH to the respiratory chain., similarity: Con a lacyl carrier domain., subunit: Mammalian complex I is composed of 45 differ subunits., Background function: Carrier of the growing fatty acid chain in fatty acid biosynthesis in mitochondria. Accessory and non-catalytic subunit of the mitochondrial member respiratory chain NADH dehydrogenase (Complex I), which functions in the transfer of electrons from NADH to the respiratory chain., similarity: Contains 1 carrier domain., subunit: Mammalian complex I is composed of 45 different subunits., matters needing Avoid repeated freezing and thawing!	Tissue Specificity	Skin,
mitochondria. Accessory and non-catalytic subunit of the mitochondrial members respiratory chain NADH dehydrogenase (Complex I), which functions in the transfer of electrons from NADH to the respiratory chain.,similarity:Contains 1 carrier domain.,subunit:Mammalian complex I is composed of 45 different subunits., matters needing Avoid repeated freezing and thawing!	Function	mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase (Complex I), which functions in the transfer of electrons from NADH to the respiratory chain.,similarity:Contains 1 acyl carrier domain.,subunit:Mammalian complex I is composed of 45 different
	Background	mitochondria. Accessory and non-catalytic subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase (Complex I), which functions in the transfer of electrons from NADH to the respiratory chain.,similarity:Contains 1 acy carrier domain.,subunit:Mammalian complex I is composed of 45 different
	matters needing attention	Avoid repeated freezing and thawing!
