

PXK mouse mAb

Catalog No	YP-mAb-08459
Isotype	IgG
Reactivity	Human; Mouse;Rat
Applications	WB
Gene Name	PXK
Protein Name	PXK
Immunogen	Synthesized peptide derived from human PXK AA range: 238-288
Specificity	This antibody detects endogenous levels of PXK at Human/Mouse/Rat
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	
Observed Band	
Cell Pathway	Cytoplasm . Cell membrane ; Peripheral membrane protein . Also associates with the plasma membrane. Isoform 3 is present throughout the cell.
Tissue Specificity	Widely expressed in all tissues examined except in heart. Isoform 1 is expressed in high levels in the brain, skeletal muscle, spleen and testis. Isoform 7 expression has yet to be demonstrated.
Function	domain:The protein kinase domain is predicted to be catalytically inactive.,function:Binds to and modulates brain Na,K-ATPase subunits ATP1B1 and ATP1B3 and may thereby participate in the regulation of electrical excitability and synaptic transmission. May not display kinase activity.,sequence caution:Translated as Gly.,similarity:Belongs to the protein kinase superfamily.,similarity:Contains 1 protein kinase domain.,similarity:Contains 1 PX (phox homology) domain.,similarity:Contains 1 WH2 domain.,subcellular location:Also associates with the plasma membrane. Isoform 3 is present throughout the cell.,tissue specificity:Widely expressed in all tissues examined except in heart. Isoform 1 is expressed in high levels in the brain, skeletal muscle, spleen and testis, expression of isoform 7 has yet to be demonstrated.,
Background	This gene encodes a phox (PX) domain-containing protein which may be involved in synaptic transmission and the ligand-induced internalization and degradation of epidermal growth factors. Variations in this gene may be associated with

susceptibility to systemic lupus erythematosus (SLE). Alternative splicing results in multiple transcript variants. [provided by RefSeq, Jan 2014],

matters needing attention

Avoid repeated freezing and thawing!

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
