

UCKL1 mouse mAb

Catalog No YP-mAb-08943 Isotype IgG Reactivity Human; Mouse Applications WB Gene Name UCKL1 URKL1 F538 Protein Name UCKL1 Immunogen Synthesized peptide derived from human UCKL1 AA range: 223-273 Specificity This antibody detects endogenous levels of UCKL1 at Human/Mouse Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Cell Pathway Cytoplasm . Nucleus . EBNA3 induces isoform 1 translocation to the nucleus, whereas it does change isoform 3 location. Tissue Specificity Ubiquitous Invariant in an approification . pathway: Pyrimidine melabolism; CUTP biosynthesis via salvage pathway; CTP from cytidine: step 1/1, p. pth. Ubiquitnated by RNF198; which induces lamily, subceilular location. EBNA3 induces isoform 1 translocation to he nucleus whereas it does change isoform 3 location, subunit: Internacts with RNF198 and EBV EBNA3, itssue specificity: Ubiquitous.		
Reactivity Human; Mouse Applications WB Gene Name UCKL1 URKL1 F538 Protein Name UCKL1 Immunogen Synthesized peptide derived from human UCKL1 AA range: 223-273 Specificity This antibody detects endogenous levels of UCKL1 at Human/Mouse Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-1:2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20*C/1 year Synonyms Observed Band Cell Pathway Cytoplasm Nucleus . EBNA3 induces isoform 1 translocation to the nucleus, whereas it does change isoform 3 location. Tissue Specificity Ubiquitous. Function Catalytic activity:ATP + cytidine = ADP + CMP, catalytic activity:ATP + uridine = ADP + UMP, function:May contribute to UTP accumulation needed for blast transformation and proliferation, pathway:Pyrimidine metabolism; CTP incy biosynthesis via salvage pathway; CTP from cytidine: step 1/3, pathway:Pyrimidine metabolism; UMP biosynthesis via salvage pathway; UMP from uridine: step 1/3, pathway:Pyrimidine metabolism; UMP biosynthesis via salvage pathway; UMP from cytidine: EBNA3 induces isoform 1 translocation to the nucleus whereas it does change isoform 3 location, subunit:Interacts with RNF19B and EBV EBNA3. Issue specificity; Ubiquitious. Background The protein encoded by this gene is a uridine kinase catalyze the phosphorylation of uridine to uridine monophosphate. This protein has been shown to bind to Epstein-Barr nuclear antigen 3 as well as natural killer in the protein is enhanced by the	Catalog No	YP-mAb-08943
Applications WB Gene Name UCKL1 URKL1 F538 Protein Name UCKL1 Immunogen Synthesized peptide derived from human UCKL1 AA range: 223-273 Specificity This antibody detects endogenous levels of UCKL1 at Human/Mouse Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. UpingBio technology Co.,Ltd

decrease in the presence of natural killer lytic-associated molecule, suggesting that association with natural killer lytic-associated molecule results in ubiquitination and subsequent degradation of this protein. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Nov 2014],
