

PENK Monoclonal Antibody

Catalog No YP-mAb-10629 Isotype IgG Reactivity Human;Rat;Mouse; Applications WB Gene Name PENK Protein Name proenkephalin Immunogen Synthetic peptide from human protein at AA range; 51-100 Specificity The antibody detects endogenous PENK protein Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-1:2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms PENK Observed Band 33kD Cell Pathway Cytoplasmic vesicle, secretory vesicle, chromaffin granule lumen. Secreted . Tissue Specificity Brain, Cerebellum, Testis, Function function. Met- and Leu-enkephalins compete with and mimic the effects of opiate drugs. They play a role in a number of physiologic functions, including pain perception and responses to stress. PENK(114-133) and PENK(237-258) increase gituatm		
Reactivity Human;Rat;Mouse; Applications WB Gene Name PENK Protein Name proenkephalin Immunogen Synthetic peptide from human protein at AA range: 51-100 Specificity The antibody detects endogenous PENK protein Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse,lgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-1:2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms PENK Observed Band 33kD Cell Pathway Cytoplasmic vesicle, secretory vesicle, chromaffin granule lumen . Secreted . Tissue Specificity Brain, Cerebellum, Testis, Function function: Met - and Leu-enkephalins compete with and mimic the effects of opiate drugs. They play a role in a number of physiologic functions, including pain perception and responses to stress. PENK(114-133) and Secretese GABA concentration in the striatum. PTN: The N-terminal domain contains 6 conserved cysteines thought to be involved in disulfied bonding ana/or processing, similarity. Belongs to the opioid neuropeptide precursor family. Background This gene encodes a preproprotein that is proteolytically processed to generate multiple protein products. These products include the perapeptide opioids whet-enkephalin and Leu-enkephalin, which are stored in synaptic vesicles, then released into the synapse where they bind to mu- and delta-opioid receptors to modulate the perception of pain. Other non-opioid cleavage products and functions in modulate the perception of pain. Other non-opioid cleavage products and function for pain.	Catalog No	YP-mAb-10629
