| <b>Tissue Specificity</b> | Expressed in brain and glioma tissue and glioma cell lines (at protein level). Expressed most highly in tissues that contain a high proportion of epithelial cells, e.g. skin, intestine, lung, and ovary.                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>Function</b>           | catalytic activity:ATP + a [protein]-L-tyrosine = ADP + a [protein]-L-tyrosine phosphate.;function:Receptor for members of the ephrin-A family. Binds to ephrin-A1, -A3, -A4 and -A5.;similarity:Belongs to the protein kinase superfamily. Tyr protein kinase family. Ephrin receptor subfamily.;similarity:Contains 1 protein kinase domain.;similarity:Contains 1 SAM (sterile alpha motif) domain.;similarity:Contains 2 fibronectin type-III domains.;subunit:Interacts with SLA (By similarity). Interacts with INPPL1/SHIP2.;tissue specificity:Expressed most highly in tissues that contain a high proportion of epithelial cells, e.g., skin, |

intestine, lung, and ovary.,

## Background

This gene belongs to the ephrin receptor subfamily of the protein-tyrosine kinase family. EPH and EPH-related receptors have been implicated in mediating developmental events, particularly in the nervous system. Receptors in the EPH subfamily typically have a single kinase domain and an extracellular region containing a Cys-rich domain and 2 fibronectin type III repeats. The ephrin receptors are divided into 2 groups based on the similarity of their extracellular domain sequences and their affinities for binding ephrin-A and ephrin-B ligands. This gene encodes a protein that binds ephrin-A ligands. Mutations in this gene are the cause of certain genetically-related cataract disorders.[provided by RefSeq, May 2010],
