

Glucagon Receptor Monoclonal Antibody

Catalog No	YP-mAb-13275
Isotype	IgG
Reactivity	Human;Mouse;Rat
Applications	WB
Gene Name	GCGR
Protein Name	Glucagon receptor
Immunogen	The antiserum was produced against synthesized peptide derived from human GLR. AA range:95-144
Specificity	Glucagon Receptor Monoclonal Antibody detects endogenous levels of Glucagon Receptor protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	GCGR; Glucagon receptor; GL-R
Observed Band	54kD
Cell Pathway	Cell membrane ; Multi-pass membrane protein . Is rapidly internalized after ligand-binding. .
Tissue Specificity	Liver,Placenta,
Function	disease:It is a candidate for certain defects in non-insulin-dependent diabetes mellitus (NIDDM). The variant in position 40 (Ser) is found in some NIDDM patients, but also in nondiabetic subjects.,function:This is a receptor for glucagon which plays a central role in regulating the level of blood glucose by controlling the rate of hepatic glucose production and insulin secretion. The activity of this receptor is mediated by G proteins which activate adenylyl cyclase and also a phosphatidylinositol-calcium second messenger system.,similarity:Belongs to the G-protein coupled receptor 2 family.,
Background	glucagon receptor(GCGR) Homo sapiens The protein encoded by this gene is a glucagon receptor that is important in controlling blood glucose levels. Defects in this gene are a cause of non-insulin-dependent diabetes mellitus (NIDDM).[provided by RefSeq, Jan 2010],

matters needing attention

Avoid repeated freezing and thawing!

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
