

TMEM185A Monoclonal Antibody

Catalog No	YP-mAb-13706
Isotype	IgG
Reactivity	Human;Mouse
Applications	WB
Gene Name	TMEM185A
Protein Name	Transmembrane protein 185A
Immunogen	The antiserum was produced against synthesized peptide derived from human TMEM185A. AA range:290-339
Specificity	TMEM185A Monoclonal Antibody detects endogenous levels of TMEM185A protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	TMEM185A; CXorf13; FAM11A; Transmembrane protein 185A; Protein FAM11A
Observed Band	41kD
Cell Pathway	Cell projection, dendrite . Membrane ; Multi-pass membrane protein .
Tissue Specificity	Brain,Iris,Liver,PCR rescued clones,Testis,
Function	similarity:Belongs to the TMEM185 family.,
Background	The protein encoded by this gene is predicted to be a transmembrane protein. This gene is best known for localizing to the CpG island of the fragile site FRAXF. The 5' untranslated region of this gene contains a CGG trinucleotide repeat sequence that normally consists of 7-40 tandem CGG repeats but which can expand to greater than 300 repeats. Methylation of the CpG island leads to transcriptional silencing of this gene, but neither the silencing nor an expanded repeat region appear to manifest itself in a clear phenotypic manner. Alternative splicing results in multiple transcript variants. A pseudogene of this gene has been defined on the X chromosome. [provided by RefSeq, Aug 2013],
matters needing attention	Avoid repeated freezing and thawing!

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
