

THOC2 mouse mAb

Catalog No	YP-mAb-18256
Isotype	IgG
Reactivity	Human;Mouse;Rat
Applications	WB
Gene Name	THOC2 CXorf3
Immunogen	Synthesized peptide derived from human THOC2
Specificity	This antibody detects endogenous levels of THOC2 at Human, Mouse
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	CXorf3;hTREX120;THO complex 2;THO complex subunit 2;Tho2;THOC2;THOC2 CXorf3;THO complex subunit 2 (Tho2) (hTREX120)
Observed Band	150 kDa
Calculated Molecular Weight	183 kDa
Cell Pathway	Nucleus . Nucleus speckle .
Tissue Specificity	Expressed in the hippocampus and the cerebral cortex.
Function	Required for efficient export of polyadenylated RNA and spliced mRNA. Acts as component of the THO subcomplex of the TREX complex which is thought to couple mRNA transcription, processing and nuclear export, and which specifically associates with spliced mRNA and not with unspliced pre-mRNA. TREX is recruited to spliced mRNAs by a transcription-independent mechanism, binds to mRNA upstream of the exon-junction complex (EJC) and is recruited in a splicing- and cap-dependent manner to a region near the 5' end of the mRNA where it functions in mRNA export to the cytoplasm via the TAP/NFX1 pathway. The TREX complex is essential for the export of Kaposi's sarcoma-associated herpesvirus (KSHV) intronless mRNAs and infectious virus production. THOC2 (and probably the THO complex) is involved in releasing mRNA from nuclear speckle domains. Required for NXF1 localization to the nuclear rim. Play
