

ILVBL rabbit pAb

Catalog No	YP-Ab-11042
Isotype	IgG
Reactivity	Human; Mouse
Applications	WB
Gene Name	ILVBL AHAS
Immunogen	Synthesized peptide derived from human ILVBL AA range: 87-137
Specificity	This antibody detects endogenous levels of ILVBL at Human/Mouse
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Polyclonal, Rabbit,IgG
Purification	The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen.
Dilution	WB 1:500-2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	HACL2;EC:4.1.2.-;AHAS;Acetolactate synthase-like protein;2-hydroxyacyl-CoA lyase 2;ILVBL;ILVBL AHAS
Observed Band	
Calculated Molecular Weight	
Cell Pathway	Endoplasmic reticulum membrane ; Single-pass membrane protein .
Tissue Specificity	Expressed in all tissues tested, with highest expression in heart, pancreas and placenta.
Function	cofactor: Binds 1 magnesium ion per subunit.,cofactor: Binds 1 thiamine pyrophosphate per subunit.,sequence caution: Sequence of unknown origin at the C-terminus.,sequence caution: Translation N-terminally extended.,similarity: Belongs to the TPP enzyme family.,tissue specificity: Expressed in all tissues tested, with highest expression in heart, pancreas and placenta.,
Background	The protein encoded by this gene shares similarity with several thiamine pyrophosphate-binding proteins identified in bacteria, yeast, and plants. The highest degree of similarity is found with bacterial acetolactate synthases (AHAS) , which are enzymes that catalyze the first step in branched-chain amino acid biosynthesis. [provided by RefSeq, Jul 2008],

**matters needing attention**

Avoid repeated freezing and thawing!

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
