| <b>Cell Pathway</b>                | Membrane; Single-pass type II membrane protein.                                                                                                                                                                      |
| <b>Tissue Specificity</b>          | Expressed specifically in mast cells. Found primarily in lung.                                                                                                                                                       |
| <b>Function</b>                    | tissue specificity:Expressed specifically in mast cells. Found primarily in lung.,                                                                                                                                   |
| <b>Background</b>                  | This gene encodes a single-pass transmembrane protein. Based on its expression pattern, it is speculated to be involved in regulating mast cell differentiation or immune responses. [provided by RefSeq, Jul 2008], |
| <b>matters needing attention</b>   | Avoid repeated freezing and thawing!                                                                                                                                                                                 |
| <b>Usage suggestions</b>           | This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.                                                                                    |
