

SNX13 rabbit pAb

Catalog No	YP-Ab-08162
Isotype	IgG
Reactivity	Human; Mouse
Applications	WB
Gene Name	SNX13 KIAA0713
Immunogen	Synthesized peptide derived from human SNX13 AA range: 602-652
Specificity	This antibody detects endogenous levels of SNX13 at Human/Mouse
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.277% sodium azide.
Source	Polyclonal, Rabbit,IgG
Purification	The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen.
Dilution	WB 1:500-2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	RGS-PX1;SNX13;SNX13 KIAA0713;Sorting nexin-13 (RGS domain- and PHOX domain-containing protein) (RGS-PX1)
Observed Band	105kD
Calculated Molecular Weight	105kD
Cell Pathway	Early endosome membrane ; Peripheral membrane protein ; Cytoplasmic side .
Tissue Specificity	Amygdala,Brain,Placenta,Testis,
Function	function:May be involved in several stages of intracellular trafficking. Act as a GAP for Galphas.,similarity:Belongs to the sorting nexin family.,similarity:Contains 1 PX (phox homology) domain.,similarity:Contains 1 PXA domain.,similarity:Contains 1 RGS domain.,
Background	This gene encodes a PHOX domain- and RGS domain-containing protein that belongs to the sorting nexin (SNX) family and the regulator of G protein signaling (RGS) family. The PHOX domain is a phosphoinositide binding domain, and the SNX family members are involved in intracellular trafficking. The RGS family members are regulatory molecules that act as GTPase activating proteins for G alpha subunits of heterotrimeric G proteins. The RGS domain of this protein interacts with G alpha(s), accelerates its GTP hydrolysis, and attenuates

G alpha(s)-mediated signaling. Overexpression of this protein delays lysosomal degradation of the epidermal growth factor receptor. Because of its bifunctional role, this protein may link heterotrimeric G protein signaling and vesicular trafficking. [provided by RefSeq, Jul 2008],
