

CLUS Monoclonal Antibody

Catalog No	YP-mAb-10811
Isotype	IgG
Reactivity	Human;Mouse;Rat
Applications	WB
Gene Name	CLU APOJ CLI KUB1 AAG4
Immunogen	Synthesized peptide derived from human CLUS Monoclonal
Specificity	This antibody detects endogenous levels of CLUS.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	CLUS;CLU APOJ CLI KUB1 AAG4;Clusterin (Aging-associated gene 4 protein) (Apolipoprotein J) (Apo-J) (Complement cytolysis inhibitor) (CLI) (Complement-associated protein SP-40;40) (Ku70-binding protein 1) (NA1/NA2) (Testosterone-;40) (Ku70-binding protein 1) (NA1/NA2) (Testosterone-repressed prostate message 2) (TRPM-2) [Cleaved into: Clusterin beta chain (ApoJalpha) (Complement cytolysis inhibitor a chain);Clusterin alpha chain (ApoJbeta) (Complement cytolysis inhibitor b chain)]
Observed Band	52kD
Calculated Molecular Weight	52kD
Cell Pathway	[Isoform 1]: Secreted . Can retrotranslocate from the secretory compartments to the cytosol upon cellular stress. .; [Isoform 4]: Cytoplasm . Keeps cytoplasmic localization in stressed and unstressed cell. .; [Isoform 6]: Cytoplasm . Keeps cytoplasmic localization in stressed and unstressed cell. .; Nucleus . Cytoplasm . Mitochondrion membrane; Peripheral membrane protein; Cytoplasmic side . Cytoplasm, cytosol . Microsome . Endoplasmic reticulum . Mitochondrion . Mitochondrion membrane . Cytoplasm, perinuclear region . Cytoplasmic vesicle, secretory vesicle, chromaffin granule . Secreted isoforms can retrotranslocate from the secretory compartments to the cytosol upon cellular stress (PubMed:17451556). Detected in perinuclear foci that may be aggresomes containing misfolded, ubiquitinated

Tissue Specificity	Detected in blood plasma, cerebrospinal fluid, milk, seminal plasma and colon mucosa. Detected in the germinal center of colon lymphoid nodules and in colon parasympathetic ganglia of the Auerbach plexus (at protein level). Ubiquitous. Detected in brain, testis, ovary, liver and pancreas, and at lower levels in kidney, heart, spleen and lung.
Function	function:Not yet clear. It is known to be expressed in a variety of tissues and it seems to be able to bind to cells, membranes and hydrophobic proteins. It has been associated with programmed cell death (apoptosis).,similarity:Belongs to the clusterin family.,subunit:Antiparallel disulfide-linked heterodimer. Interacts with APOA1, CLUAP1 AND PON1.,
Background	The protein encoded by this gene is a secreted chaperone that can under some stress conditions also be found in the cell cytosol. It has been suggested to be involved in several basic biological events such as cell death, tumor progression, and neurodegenerative disorders. Alternate splicing results in both coding and non-coding variants.[provided by RefSeq, May 2011],
matters needing attention	Avoid repeated freezing and thawing!
Usage suggestions	This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
