

CD37 Monoclonal Antibody

Catalog No	YP-mAb-14026
Isotype	IgG
Reactivity	Human;Mouse;Rat
Applications	WB
Gene Name	CD37
Immunogen	The antiserum was produced against synthesized peptide derived from the Internal region of human CD37. AA range:81-130
Specificity	CD37 Monoclonal Antibody detects endogenous levels of CD37 protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	CD37 molecule;GP52 40;Leukocyte antigen CD37;Tetraspanin 26;Tspan 26; CD37;TSPAN26;Tetraspanin-26;Tspan-26
Observed Band	30kD
Calculated Molecular Weight	30kD
Cell Pathway	Membrane; Multi-pass membrane protein.
Tissue Specificity	B-lymphocytes.
Function	similarity:Belongs to the tetraspanin (TM4SF) family.,tissue specificity:B-lymphocytes.,
Background	The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. This encoded protein is a cell surface glycoprotein that is known to complex with integrins and other transmembrane 4 superfamily proteins. It may play a role in T-cell-B-cell interactions. Alternate splicing results in multiple transcript variants encoding

different isoforms. [provided by RefSeq, Jul 2008],

matters needing attention

Avoid repeated freezing and thawing!

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
