

CD223 Monoclonal Antibody

Catalog No	YP-mAb-14036
Isotype	IgG
Reactivity	Human;Mouse;Rat
Applications	WB
Gene Name	LAG3
Immunogen	The antiserum was produced against synthesized peptide derived from the Internal region of human LAG3. AA range:91-140
Specificity	CD223 Monoclonal Antibody detects endogenous levels of CD223 protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	CD223;LAG3;FDC;LAG 3;LAG-3;Lymphocyte activation gene 3 protein;Protein FDC
Observed Band	57kD
Calculated Molecular Weight	57kD
Cell Pathway	[Lymphocyte activation gene 3 protein]: Cell membrane ; Single-pass type I membrane protein .; [Secreted lymphocyte activation gene 3 protein]: Secreted . Produced following cleavage of the main chain. .
Tissue Specificity	Primarily expressed in activated T-cells and a subset of natural killer (NK) cells.
Function	function:Involved in lymphocyte activation. Binds to HLA class-II antigens., similarity:Contains 1 Ig-like V-type (immunoglobulin-like) domain., similarity:Contains 3 Ig-like C2-type (immunoglobulin-like) domains.,tissue specificity:On cell surface of activated NK and T-lymphocytes.,
Background	Lymphocyte-activation protein 3 belongs to Ig superfamily and contains 4 extracellular Ig-like domains. The LAG3 gene contains 8 exons. The sequence data, exon/intron organization, and chromosomal localization all indicate a close relationship of LAG3 to CD4. [provided by RefSeq, Jul 2008],

**matters needing attention**

Avoid repeated freezing and thawing!

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
