

GDF-7 Monoclonal Antibody

Catalog No	YP-mAb-16067
Isotype	IgG
Reactivity	Human;Mouse;Rat
Applications	WB
Gene Name	GDF7
Immunogen	The antiserum was produced against synthesized peptide derived from the Internal region of human GDF7. AA range:321-370
Specificity	GDF-7 Monoclonal Antibody detects endogenous levels of GDF-7 protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	bmp12;bone morphogenetic protein 12;GDF-7;Gdf7;GDF7_HUMAN;growth differentiation factor 7;Growth/differentiation factor 7
Observed Band	47kD
Calculated Molecular Weight	47kD
Cell Pathway	Secreted .
Tissue Specificity	Testis,
Function	function:May play an active role in the motor area of the primate neocortex., similarity:Belongs to the TGF-beta family.,subunit:Homodimer; disulfide-linked.,
Background	This gene encodes a secreted ligand of the TGF-beta (transforming growth factor-beta) superfamily of proteins. Ligands of this family bind various TGF-beta receptors leading to recruitment and activation of SMAD family transcription factors that regulate gene expression. The encoded preproprotein is proteolytically processed to generate each subunit of the disulfide-linked homodimer. This protein may play a role in the differentiation of tendon cells and spinal cord interneurons. A mutation in this gene may be associated with increased risk for Barrett's esophagus and esophageal adenocarcinoma.
