

VCAM1 mouse mAb

Catalog No	YP-mAb-17120
Isotype	IgG
Reactivity	Human;Mouse;Rat
Applications	WB
Gene Name	VCAM1 L1CAM
Immunogen	Synthesized peptide derived from human VCAM1
Specificity	This antibody detects endogenous levels of Human VCAM1
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-1:2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	VCAM1;VCAM-1;V CAM 1;Soluble Vascular Cell Adhesion Molecule-1;L1CAM;VCAM1 L1CAM;Vascular cell adhesion protein 1 (V-CAM 1;INCAM-100;CD antigen CD106)
Calculated Molecular Weight	739 aa, 81 kDa
Observed Band	110 kDa
Cell Pathway	Membrane; Single-pass type I membrane protein.
Tissue Specificity	Expressed on inflamed vascular endothelium, as well as on macrophage-like and dendritic cell types in both normal and inflamed tissue.
Function	alternative products:Additional isoforms seem to exist,disease:May play an important role in the genesis of atherosclerosis and rheumatoid arthritis., domain:Either the first or the fourth Ig-like C2-type domain is required for VLA4-dependent cell adhesion.,function:Important in cell-cell recognition. Appears to function in leukocyte-endothelial cell adhesion. Interacts with the beta-1 integrin VLA4 on leukocytes, and mediates both adhesion and signal transduction. The VCAM1/VLA4 interaction may play a pathophysiologic role both in immune responses and in leukocyte emigration to sites of inflammation.,induction:By cytokines (e.g. IL-1, TNF-alpha),online information:VCAM-1,online information:VCAM1 entry,PTM:Sialoglycoprotein.,similarity:Contains 7 Ig-like C2-

type (immunoglobulin-like) domains.,subunit: Binds to ECMV-D capsid proteins and acts as a receptor for this virus.,tissue specificit

Background

This gene is a member of the Ig superfamily and encodes a cell surface sialoglycoprotein expressed by cytokine-activated endothelium. This type I membrane protein mediates leukocyte-endothelial cell adhesion and signal transduction, and may play a role in the development of atherosclerosis and rheumatoid arthritis. Three alternatively spliced transcripts encoding different isoforms have been described for this gene. [provided by RefSeq, Dec 2010],
